#HTID

## — Why attending? —

Be part of the European investment hub supporting European HealthTech companies development. Accelerate innovation by setting a privilege place between C-level executives from the most European innovative companies in HealthTech, worldwide investors, pharmaceutical companies, KOL, experts and institutional.

## — Our Ambition —

By renewing the **HTID® (HealthTech Innovation Days) event on June 22 and 23, France Biotech** confirms its desire to promote access for all patients to cutting-edge HealthTech technologies.

In June 2019, the **HTID®** event brought together more than 500 innovation experts in the health and life sciences fields and promoted more than 900 fruitful meetings between the players present, startups and funds.

In June 2020, with the purpose to contribute to a sustainable future of healthcare, the **HTID®** will gather an active community, empowering a network of experts from across industry, academia, government, finance, in Europe and elsewhere.

"Europe is a land of innovation in health with many start-up and SME's looking for financing to make their innovations available to patients and to meet the medical challenges of tomorrow. The objective of the **HTID®** is to become a reference place for exchanges between European Health-Tech companies, international investors and pharmaceutical groups"  
- **Maryvonne Hiance, President of the HTID®**

"Thanks to the innovations it develops for the benefit of patients, the HealthTech industry constitutes indeed a major societal issue for health. To ultimately reach patients, these developments are characterized by huge funding needs, for an important duration."  
- **Franck Mouthon, President of France Biotech**
