

[Science Against SARS-CoV-2]:

Achievements and Future Perspectives

Virtual Conference
6-8 October 2020

Virtual conference on achievements and future perspectives in the fight against SARS-CoV-2

Join scientific experts from around the world for the 'Science Against SARS-CoV-2' virtual conference and learn about:

- SARS-CoV-2 pathogen-host biology
- The route to developing effective vaccines and therapeutics
- Current and emerging viral detection methods
- Monitoring the virus spread globally

Since the discovery of SARS-CoV-2, Thermo Fisher Scientific has been collaborating with scientists worldwide, supporting them to understand and respond to the spread of the virus.

To further support science in this fight, this free virtual conference will provide an international discussion forum to present and discuss lessons learned and current challenges, and to facilitate exchange of scientific knowledge and encourage collaboration.

Be part of the first **Science Against SARS-CoV-2** virtual conference and sign up today.

thermofisher.com/science-against-sars-cov-2

Day(s)	Topic(s)
Day 1 Tuesday 6th October	Dissecting host-pathogen biology and interactions
Day 2 Wednesday 7th October	Vaccine & therapeutic development strategies
Day 3 Thursday 8th October	Detection techniques and epidemiology studies for SARS-CoV-2 infection

Each day will be composed of keynote lectures, scientific presentations and Q&A forums/discussions.
